CAREER OBJECTIVE

Results driven Flutter Engineer with 1+ years of experience delivering high performance cross platform mobile applications for enterprise clients. Skilled in state management (Bloc, Provider, Riverpod), RESTful API integration, CICD pipelines, and security hardening. Passionate about creating seamless user experiences and solving complex technical challenges

EDUCATION

ESPRIT, Tunis, Tunisia 2018–2023

Masters in Computer Science | GPA: N/A

WORK EXPERIENCE

Value Digital Services – Mobile Engineer Feb 2023 – Present

- Led end-to-end development of “Dima Maak,” a Flutter-based insurance app serving over 10,000 users, achieving a 30% reduction in load time through lazy loading, caching, and image compression.
- Implemented SSL pinning and device-root detection, decreasing man-in-the-middle attack surface by 30% and blocking 95% of emulator/rooted device usage.
- Migrated state management from Provider to Bloc, improving code maintainability and scalability.

- • Managed CI/CD pipelines with Jenkins and AppCenter, automating builds and deployments to app stores.
- • Coordinated cross-functional teams during User Acceptance Test phase, resolving all reported bugs and passing penetration testing.

Freelance – Mobile Engineer Nov 2024 – Present

- • Designed and built a complete Flutter ecosystem for a fitness studio client, including a mobile booking app and an admin web panel.
- • Integrated Firebase services (Authentication, Realtime Database, Cloud Messaging) and Stripe payments, delivering real-time booking, class scheduling, and secure transactions.
- • Developed a white-label architecture using environment-specific configuration files, enabling rapid rebranding for multiple clients.
- • Implemented automated testing (unit and integration) and CI/CD with GitLab CI, reducing release cycle time by 40%.
- • Delivered comprehensive documentation and training to staff, ensuring smooth handover and ongoing maintenance.

Value Digital Services – Lead Mobile Engineer Mar 2023 – Oct 2023

- • Supervised a team of developers and UI/UX designers, establishing coding standards and review processes.

- • Prioritized feature backlog in collaboration with product owners, achieving on-time delivery of MVP and subsequent releases.
- • Conducted security workshops, introducing SSL pinning and secure storage practices adopted across the organization.
- • Mentored junior developers on Bloc architecture and best practice testing, improving overall team proficiency.
- • Presented project progress and metrics to senior management, securing additional funding for post-launch enhancements.

LEADERSHIP EXPERIENCE

Value Digital Services – Lead Mobile Engineer – Dima Maak Project Mar 2023 – Oct 2023

- • Led a cross-functional team of developers and UI/UX designers, establishing coding standards and review processes.
- • Coordinated with product owners to prioritize the feature backlog, delivering the MVP and subsequent releases on schedule.
- • Conducted security workshops and mentored junior developers on best practice testing and secure coding.
- • Presented project metrics and progress to senior management, securing additional funding for post-launch enhancements.

PROJECTS

Dima Maak – Insurance Mobile Application – Flutter Engineer (Lead) Feb 2023 – Aug 2023

- Delivered a cross-platform insurance app for a major Tunisian bank subsidiary, reaching over 10,000 active users.
- Implemented secure authentication, push notifications, and real-time policy updates using Firebase services.
- Optimized performance through lazy loading, image compression, and efficient Bloc state management.
- Integrated RESTful APIs for policy data retrieval, claims processing, and payment handling.
- Performed comprehensive QA and penetration testing, resulting in a 95 % bug-free release.

FitHub – Fitness Studio Booking Management Suite – Full-Stack Flutter Engineer Nov 2024 – Present

- Created a mobile booking application and an admin web dashboard for real-time class scheduling and member management.
- Integrated Firebase Cloud Functions to send automated email reminders and generate analytics reports.

- Implemented Stripe payment processing for subscriptions and one-time purchases, adhering to PCI-DSS standards.
- Developed a white-label architecture with environment-specific configuration files for rapid rebranding across multiple studios.
- Set up CI/CD pipelines with GitLab CI and automated test suites to ensure reliable continuous delivery.

SKILLS TRAINING

Soft Skills: Effective communication with cross-functional teams, Strong teamwork and collaboration with UI/UX designers and business analysts, Leadership and mentorship of junior developers, Problem-solving and analytical thinking for complex technical challenges, Adaptability and ability to deliver under tight deadlines

Technical Skills: Proficient in Flutter and Dart for cross-platform mobile development, State-management expertise with Bloc, Provider, and Riverpod, RESTful API integration and backend services using Firebase and Stripe, CI/CD pipeline creation with Jenkins, GitLab CI, AppCenter, and Fastlane, Security implementation including SSL pinning, device-root detection, and secure storage, Automated testing (unit, integration, UI) and quality assurance

Training: Coursera “Mobile App Development with Flutter” (2022) certification, Udemy “Advanced Flutter Dart” (2023) course completion, Internal security workshops on SSL pinning and secure storage practices, CI/CD pipeline training using Jenkins and GitLab CI, Agile/Scrum methodology training and sprint planning workshops
