CAREER OBJECTIVE

Results driven Flutter Engineer with over 1 year of experience delivering high performance cross platform mobile applications. Proven ability to design scalable Flutter solutions, optimize performance, and enforce robust security for enterprise level projects. Skilled in state management (Bloc, Provider, Riverpod), RESTful API integration, and CI CD pipelines. Passionate about creating seamless user experiences and solving complex technical challenges

EDUCATION

ESPRIT, Tunis, Tunisia 2018–2023

Masters in Computer Science | GPA: N/A

WORK EXPERIENCE

Value Digital Services – Mobile Engineer Feb 2023 – Present

- Led end-to-end development of “Dima Maak,” a Flutter-based insurance app serving >10 000 users for a subsidiary of Tunisia’s leading bank.
- Coordinated cross-functional teams (Business Analysts, UI/UX Designers, DevOps) to streamline development cycles and achieve seamless releases on the App Store and Google Play.
- Implemented SSL pinning and device root detection, reducing man-in-the-middle attack risk by 30 % and blocking 95 % of emulator/rooted device usage.

- Migrated state management from Provider to Bloc, improving code maintainability and reducing UI latency by 20 %.
- Managed CI/CD pipelines with Jenkins and App Center, automating build, test, and deployment processes for faster time to market.

Self-Employed – Mobile Engineer (Freelance) Nov 2024 – Present

- Designed and built a full stack Flutter mobile app for fitness studio booking, real time class scheduling, and member management for a Dubai based client.
- Integrated Firebase Authentication, Cloud Firestore, and push notifications to deliver secure, real time data synchronization across iOS and Android devices.
- Implemented Stripe payment processing and Firebase Cloud Functions for automated billing and scalable backend operations.
- Developed a companion admin web portal using Flutter Web, enabling gym owners to monitor registrations, schedules, and analytics.
- Delivered a white label solution with environment specific configuration via .env files, allowing rapid branding customization for multiple clients.

Value Digital Services – Lead Mobile Engineer Feb 2023 – Present

- Directed a multidisciplinary team of 5 developers and designers to deliver the “Dima Maak” insurance app within a 6 month timeline.

- • Established coding standards and peer review processes, improving code quality and reducing post-release defects by 25 %.
- • Championed security best practices, introducing SSL pinning and device integrity checks that lowered vulnerability exposure.
- • Oversaw User Acceptance Testing, coordinating feedback loops and ensuring compliance with regulatory and security guidelines.

LEADERSHIP EXPERIENCE

Value Digital Services – Lead Mobile Engineer Feb 2023 – Present

- • Directed a multidisciplinary team of 5 developers and designers to deliver the “Dima Maak” insurance app within a 6-month timeline.
- • Established coding standards and peer review processes, improving code quality and reducing post-release defects by 25 %.
- • Championed security best practices, introducing SSL pinning and device integrity checks that lowered vulnerability exposure.
- • Oversaw User Acceptance Testing, coordinating feedback loops and ensuring compliance with regulatory and security guidelines.

PROJECTS

Dima Maak – Mobile Insurance Application – Lead Mobile Engineer Feb 2023 – Present

- • Delivered a cross-platform Flutter app used by >10 000 policyholders for account management, claim filing, and notifications.
- • Integrated RESTful APIs and Firebase services for real-time data updates and secure authentication.
- • Optimized asset loading with lazy loading and image compression, achieving a 30 % reduction in app launch time.
- • Implemented comprehensive unit and integration test suites, attaining 85 % test coverage.

Fitness Studio Booking Management System – Full-Stack Flutter Developer (Freelance) Nov 2024 – Present

- • Created a mobile app for real-time class bookings, schedule management, and member profiles.
- • Integrated Stripe for secure online payments and Firebase Cloud Functions for automated email confirmations.
- • Built an admin dashboard with Flutter Web, providing analytics, member tracking, and schedule control.
- • Delivered a white-label architecture enabling rapid re-branding for multiple studio clients via configurable environment files.

SKILLS TRAINING

Soft Skills: Communication, Teamwork, Leadership, Problem solving, Adaptability

Technical Skills: Flutter development with Dart, RESTful API integration, CI/CD pipeline management (Jenkins, Fastlane, GitLab CI, App Center), State management using Bloc, Provider, Riverpod, Firebase backend services (Authentication, Cloud Firestore, Push Notifications), Mobile security implementation (SSL pinning, device integrity checks), Testing (unit, integration, UI) for mobile applications

Training: Flutter development workshop, CI/CD pipeline training (Jenkins, Fastlane, GitLab CI), Security best practices certification (SSL pinning, device integrity), Firebase services training (Authentication, Cloud Firestore, Push Notifications), State management patterns training (Bloc, Provider, Riverpod), Mobile engineering coursework, DevOps training
