PROFESSIONAL SUMMARY

Results driven Flutter Engineer with 1+ years of experience delivering high performance cross platform mobile applications for enterprise clients. Proven expertise in scalable Flutter development, performance optimization, security hardening, state management (Bloc Provider Riverpod), RESTful API integration, and CI/CD pipelines. Passionate about crafting seamless user experiences and solving complex technical challenges

WORK EXPERIENCE

Mobile Engineer | *Value Digital Services* | Tunis, Tunisia | Feb 2023 – Present

- Led the end-to-end development of Dima Maak, a Flutter-based insurance app for a subsidiary of Tunisia's leading bank, now serving 10 000+ active users.
- Collaborated with Business Analysts, UI/UX Designers, and DevOps engineers to streamline development cycles and achieve flawless releases on the App Store and Google Play.
- Implemented SSL pinning and device integrity checks, reducing Man-in-the-Middle attack surface by 30 % and blocking 95 % of emulator/rooted device usage.
- Optimized load times by 30 % through lazy loading, image compression, and intelligent caching; migrated state management from Provider to Bloc, improving code maintainability.
- Managed CI/CD pipelines with Jenkins and AppCenter, automating build, test, and deployment processes for both iOS and Android platforms.

Mobile Engineer | *Freelance* | Dubai, UAE | Nov 2024 – Present

- Designed and built a complete Flutter mobile solution for a Dubai-based fitness studio, featuring real-time booking, class scheduling, and member management.
- Integrated Firebase Authentication, Cloud Firestore, and Push Notifications to provide secure, real-time data synchronization across devices.
- Added Stripe payment integration and Firebase Cloud Functions for automated billing and backend workflows, enhancing scalability and reliability.
- Developed a companion Flutter web admin panel enabling gym owners to monitor registrations, schedules, and analytics, delivering a unified management experience.
- Implemented a white-label architecture using environment-specific configuration files, allowing rapid rebranding for multiple clients.

Lead Mobile Engineer | *Value Digital Services* | Tunis, Tunisia | Feb 2023 – Present

- Directed a cross-functional team of 4 developers, designers, and QA engineers throughout the full product lifecycle of the Dima Maak app.
- Defined technical standards and best-practice guidelines for Flutter code quality, state management, and security, resulting in a 25 % reduction in post-release defects.

- Conducted regular sprint planning and retrospectives, fostering an Agile environment that improved delivery speed by 15 %.
- Mentored junior developers on Bloc architecture and CI/CD setup, accelerating onboarding and skill development.

EDUCATION

Masters in Computer Science | *ESPRIT* | Tunis, Tunisia | 2018–2023

- Coursework: Mobile Engineering
- Coursework: Networking
- Coursework: DevOps
- Coursework: Data Structures
- Coursework: Software Architecture

PROJECTS

Dima Maak Insurance App | *Flutter Engineer* | Tunis, Tunisia | Feb 2023 – Present

- **Delivered a cross-platform insurance application with 10 000+ users, incorporating secure login, policy management, and real-time claim filing.**
- **Implemented SSL pinning and device integrity checks, cutting security-related incidents by 30 %.**
- **Utilized Bloc for robust state management, achieving a 20 % reduction in UI-related bugs.**

Fitness Studio Booking App | *Flutter Engineer* | Dubai, UAE | Nov 2024 – Present

- **Built a full-stack mobile app enabling clients to book classes, manage memberships, and receive push notifications.**
- **Integrated Stripe for secure payment processing and Firebase Cloud Functions for automated email confirmations.**
- **Implemented Firebase Authentication and Cloud Firestore for real-time data synchronization across devices.**

Gym Admin Web Panel | *Flutter Web Engineer* | Dubai, UAE | Nov 2024 – Present

- Created a responsive admin dashboard for gym owners to track member activity, schedule classes, and view analytics.
- Implemented a white-label solution using .env configuration, allowing rapid re-branding for multiple studio partners.
- Integrated analytics dashboards to visualize member activity and class attendance for informed decision-making.

SKILLS & COMPETENCIES

Technical Skills: - Flutter and Dart development for iOS and Android, - State management frameworks: Bloc, Provider, Riverpod, - RESTful API integration and Firebase services (Auth, Firestore, Cloud Functions, Push Notifications), - CI/CD pipelines using Jenkins, Fastlane, GitLab CI, and AppCenter, - Testing methodologies: unit, integration, widget testing, and TDD, - Security hardening techniques such as SSL pinning and device integrity checks, - Performance optimization through lazy loading, image compression, and caching

Core Competencies: - Strong communication and collaboration with cross-functional teams, - Effective teamwork with designers, analysts, and DevOps engineers, - Leadership and mentorship of junior developers, - Agile sprint planning and retrospective facilitation, - Problem-solving and adaptability in fast-paced environments

Languages: Arabic - Native, English - Proficient, French - Proficient

Training & Certifications: - Google Certified Flutter Developer (2022), - Udacity Android Kotlin Nanodegree (2021), - Coursera Secure Mobile Application Development (2023), - Ongoing professional development in DevOps and CI/CD best practices, - Participation in Agile/Scrum workshops and code review sessions
