PROFESSIONAL SUMMARY

Motivated Flutter Engineer with over 1 year of professional experience seeking to leverage expertise in cross platform mobile development, state management, and CICD pipelines to deliver high performance, secure applications for a forward thinking organization

WORK EXPERIENCE

Lead Mobile Engineer | *Value Digital Services* | Tunis, Tunisia | Feb 2023 – Present

- Directed a cross-functional team of 4 developers, designers, and QA engineers through the full product lifecycle of “Dima Maak.”
- Defined architectural standards and coding guidelines, resulting in a 25 % reduction in code review cycles.
- Conducted weekly sprint planning and retrospective meetings, fostering Agile best practices and continuous improvement.
- Mentored junior developers on Bloc pattern, testing strategies, and performance optimization techniques.
- Coordinated with security auditors to validate SSL pinning and device integrity checks, achieving compliance with industry standards.

EDUCATION

Masters in Computer Science | *ESPRIT* | Tunis, Tunisia | 2018-2023

- **Coursework: Mobile Engineering**
- **Coursework: Networking**
- **Coursework: DevOps**
- **Coursework: Data Structures**

SKILLS & COMPETENCIES

Technical Skills: - Flutter and Dart development for cross-platform mobile apps, - State management expertise with Bloc, Provider, and Riverpod, - RESTful API integration and Firebase services (Auth,

Firestore, Cloud Functions, Messaging), - CI/CD pipeline creation using Jenkins, Fastlane, GitLab CI, and AppCenter, - Security implementation such as SSL pinning and device integrity checks, - Unit, integration, and UI testing (Flutter Driver), - Performance optimization through lazy loading, caching, and profiling

Core Competencies: - Strong communication and interpersonal skills, - Effective teamwork and collaboration across cross-functional teams, - Leadership and mentorship abilities, - Agile sprint planning and retrospective facilitation, - Problem-solving and adaptability in fast-paced environments

Languages: English – Proficient, French – Proficient, Arabic – Native

Training & Certifications: - Mobile Engineering coursework, - Networking coursework, - DevOps coursework, - Data Structures coursework, - Internal training on CI/CD pipelines with Jenkins and AppCenter, - Security best practices workshop covering SSL pinning and device root detection
