CAREER OBJECTIVE

EDUCATION

ESPRIT, Tunis, Tunisia 2018–2023

Masters in Computer Science | GPA: N/A

WORK EXPERIENCE

Value Digital Services – Mobile Engineer Feb 2023 – Present

- Led the development of Dima Maak a Flutter based insurance app serving 10000+ users for a subsidiary of Tunisia's leading bank.
- Collaborated with Business Analysts UI UX Designers and DevOps to streamline development and ensure seamless releases on the App Store and Google Play.
- Implemented SSL pinning and device root detection reducing man in the middle attacks by 30% and blocking 95% of emulator rooted device usage.
- Optimized performance through lazy loading caching and image compression cutting app load time by 30%.

- • Migrated state management from Provider to Bloc improving code maintainability and scalability.

Freelance – Mobile Engineer Nov 2024 – Present

- • Designed and built a full stack Flutter mobile app for fitness studio booking featuring real time class scheduling member management and secure Stripe payments.
- • Integrated Firebase Authentication Realtime Database and Cloud Functions to provide instant data sync and push notifications.
- • Developed a complementary Flutter web admin panel enabling gym owners to monitor registrations schedules and analytics.
- • Implemented a white label solution using environment specific env files allowing rapid branding for multiple clients.
- • Managed end to end CI CD pipelines with App Center automating builds and deployments to iOS and Android stores.

LEADERSHIP EXPERIENCE

Value Digital Services – Lead Mobile Engineer Feb 2023 – Present

- • Directed a cross-functional team of 5+ developers, designers, and QA specialists throughout the full product lifecycle of the Dima Maak app.

- Established coding standards and review processes that reduced code review turnaround time by 25% and improved overall code quality.
- Coordinated User Acceptance Testing, prioritizing and resolving critical bugs and security findings before release.
- Mentored junior developers in Flutter best practices, state management patterns, and performance optimization.
- Championed the adoption of CI/CD tooling (Jenkins + App Center), cutting release cycle time from 2 weeks to 3 days.

PROJECTS

Dima Maak – Insurance Mobile Application – Mobile Engineer Feb 2023 – Present

- Delivered a secure, high-performance Flutter app for a major bank's insurance subsidiary, reaching 10 000+ active users.
- Integrated RESTful APIs and Firebase services for real-time policy data and push notifications.
- Implemented SSL pinning and device root detection, enhancing security posture.
- Optimized asset handling and lazy loading, achieving a 30 % reduction in launch time.
- Managed automated builds and store deployments via Jenkins and App Center.

Fitness Studio Booking Management App – Lead Developer Nov 2024 – Present

- Created a complete Flutter solution for booking, class scheduling, and member management for a Dubai-based fitness studio.
- Integrated Stripe for secure online payments and Firebase Cloud Functions for backend automation.
- Implemented real-time data sync and push notifications to improve user engagement.
- Developed a white-label architecture enabling rapid re-branding for multiple studio clients.
- Established CI/CD pipelines with App Center, ensuring rapid and reliable releases.

Gym Owner Admin Panel (Web) – Full-Stack Developer Nov 2024 – Present

- Built a responsive Flutter web admin dashboard that provides gym owners with analytics, member registration, and schedule management.
- Connected the panel to Firebase Firestore for live data updates and reporting.
- Designed role-based access controls to protect sensitive operational data.
- Implemented environment-specific configuration files for seamless client customization.

- Conducted user testing sessions, incorporating feedback to enhance UI/UX and workflow efficiency.

SKILLS TRAINING

Soft Skills: - Communication and collaboration, - Leadership and team direction, - Mentoring and coaching junior developers, - Problem solving and analytical thinking, - Adaptability and continuous learning

Technical Skills: - Flutter and Dart development, - State management using Bloc, Provider, Riverpod, - RESTful API integration and backend services, - CI/CD pipeline creation with Jenkins, Fastlane, GitLab CI, App Center, - Security implementation including SSL pinning and device-root detection

Training: - Completed Flutter development training, - Attended CI/CD pipeline workshop, - Completed Firebase services integration training, - Completed security best practices training (SSL pinning, root detection), - Attended mobile performance optimization workshop
